March 2000 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 7 Issue 1

Full text available: 📄 pdf(934.75 KB)   Additional Information: full citation, abstract, references, citings, index terms, review

A challenge for human-computer interaction researchers and user interf ace designers is to construct information technologies that support creativity. This ambitious goal can be attained by building on an adequate understanding of creative processes. This article offers a four-phase framework for creativity that might assist designers in providing effective tools for users: (1)Collect: learn from provious works stored in libraries, the Web, etc.; (2) Relate ...

Jaideep Srivastava, Robert Cooley, Mukund Deshpande, Pang-Ning Tan
January 2000 **ACM SIGKDD Explorations Newsletter**, Volume 1 Issue 2

Full text available: 📄 pdf(1.44 MB)   Additional Information: full citation, abstract, references, citings

Web usage mining is the application of data mining techniques to discover usage patterns from Web data, in order to understand and better serve the needs of Web-based

h   c   g e   cf   e   e   h   b   e   e   e

applications. Web usage mining consists of three phases, namely *preprocessing, pattern discovery*, and *pattern analysis*. This paper describes each of these phases in detail. Given its application potential, Web usage mining has seen a rapid increase in interest, from both the research and practice communities. This pap ...

106 Time-machine computing: a time-centric approach for the information environment
Jun Rekimoto
November 1999 **Proceedings of the 12th annual ACM symposium on User interface software and technology**

Full text available: pdf(863.69 KB)   Additional Information: full citation, abstract, references, citings, index terms

This paper describes the concept of Time-Machine Computing (TMC), a time-centric approach to organizing information on computers. A system based on Time-Machine Computing allows a user to visit the past and the future states of computers. When a user needs to refer to a document that he/she was working on at some other time, he/she can travel in the time dimension and the system restores the computer state at that time. Since the user's activities on the system are automati ...

112 Transparent distributed processing for rendering

Peter Kipfer, Philipp Slusallek

October 1999 **Proceedings of the 1999 IEEE symposium on Parallel visualization and graphics**

Full text available: pdf(4.15 MB)   Additional Information: full citation, abstract, references, citings, index terms

Rendering, in particular the computation of global illumination, uses computationally very demanding algorithms. As a consequence many researchers have looked into speeding up the computation by distributing it over a number of computational units. However, in almost all cases did they completely redesign the relevant algorithms in order to achieve high efficiency for the particular distributed or parallel environment. At the same time global illumination algorithms have gotten m ...

113 PLIC: bridging the gap between streamlines and LIC

Vivek Verma, David Kao, Alex Pang

October 1999 **Proceedings of the conference on Visualization '99: celebrating ten years**

Full text available: pdf(3.28 MB)   Additional Information: full citation, abstract, references, citings, index terms

This paper explores mapping strategies for generating LIC-like images from streamlines and streamline-like images from LIC. The main contribution of this paper is a technique which we call pseudo-LIC or PLIC. By adjusting a small set of key parameters, PLIC can generate flow visualizations that span the spectrum of streamline-like to LIC-like images. Among the advantages of PLIC are: image quality comparable with LIC, performance speedup over LIC, use of a template texture that is independe ...

118 Personal imaging and lookpainting as tools for personal documentary and investigative photojournalism

Steve Mann

March 1999 **Mobile Networks and Applications**, Volume 4 Issue 1

Full text available: pdf(2.24 MB)   Additional Information: full citation, abstract, references, citings, index terms

A means and apparatus for covert capture of extremely high-resolution photorealistic images is presented. The apparatus embodies a new form of user-interface – instead of the traditional "point and click" metaphor which was thought to be the simplest photography had to offer, what is proposed is a "look" metaphor in which images are generated through the natural process of looking around, in a manner that does not require conscious thought or effort. These &ldq ...
